1x1 Classes

## Chess Classes

It takes years to master Chess, with our innovative approach, children pickup the idea of chess much faster. We do chess as a sport rather than academic. Children learn chess as team and perform individually.

## Our Format

We teach chess like a net practice in sports. The idea is to go over the concepts in depth repeatedly until the children gain better ratings.

Once the children improve their ratings, they are moved to next level. A child joining particular level stays with the same coach through out the duration. The coach ensures even if the child attends one or two days a week, learns all the concepts.

Enroll for 8 sessions at affordable cost

We teach Chess starting from absolute beginner level to advanced levels for children of 5 years and above. Our coaches are professional and friendly. We have structured our coaching as a cycle of 8 content rich sessions, each sessions spanning 1 hour. The classes happen over Zoom online conference.

These 8 sessions can be taken as weekly 2 classes or 3 classes according to your convenience. We have batch classes at convenient timeslots from Tuesday to Sunday (Monday is holiday). If the child is totally new to Chess, we provide 1x1 classes for the first 3 sessions and then have them join other kids.

Apart from coaching over zoom, we also provide access to our Chess club in ChessKid.com. This is a babified platform for kids to learn Chess. In ChessKid, the child can use it to do puzzles, games against other kids and bots. The coach can also see the Kids games and help them improve. Our club in ChessKid has 1000+ Kids. By playing games and tournaments the child gets ratings and as they win more games the ratings increase. We run weekly practice tournaments and monthly tournaments in our club.

Parents can also see the progress in rating on the website. Typically from absolute beginner to lower intermediate levels, it takes about 24 to 32 sessions.

## Progress Report

See your child improve in Chess, by tracking thier efforts in the safest online platform chesskid.

## Tournaments

We have monthly tournaments and weekly practice tournaments. The children can test their skills against similar rated players.

# Curriculum
